

# CPA101 - CCPA FOR SOFTWARE DEVELOPMENT

## Course Learning Objectives

Discuss the privacy requirements of CCPA and how it affects your business.  
Define CCPA compliance requirements for your application or website.  
Implement CCPA policy updates, opt-out of sale, and consumer request intake features.  
Distinguish between EU GDPR and CCPA requirements.

## Description

This course will introduce you to the California Consumer Privacy Act (CCPA) and its effect on you as a software developer. After taking this course, you should be able to adopt CCPA compliance in your daily tasks and identify a non-compliance risk at the very beginning.

### Audience

Software Developers

### Time Required

Tailored learning - 25 minutes total (approx.)
